Newly Launched Pre-mixed Flavor Formulation (Fruit) for Aminoleban EN[®] Powder (HK-52479), an Oral Nutritional Supplement for People Concerned about Nutritional Deficiencies and Liver Health

A **pre-mixed fruit flavor formulation has been launched for Aminoleban EN[®] Powder (HK-52479)**, an oral nutritional supplement for patients who are concerned about nutritional deficiencies and liver health. The formulation has become available for use by medical institutions in Hong Kong on January 17, 2022.

The Aminoleban EN[®] formulation henceforth will include a premixed fruit flavouring, giving a convenient and palatable form of oral nutrition support.

Concurrently, we have discontinued supply of the previous Aminoleban EN[®] Powder formulation and the separately packaged pineapple-taste flavouring powder.
